CAREER OBJECTIVE

Motivated Computer Science Engineering student with foundational skills in Python, SQL. Eager to apply problem-solving abilities, learn emerging technologies, and contribute to innovative IT/software solutions as a fresher in the technology industry.

TECHNICAL SKILLS

Programming / Coding Languages: C, Python
Database: MySQL
Scripting Languages: HTML5, CSS,
Designing: Canva Adobe Photoshop
Core Concepts: Object-Oriented Programming (OOPS), DBMS

PROJECTS

Serene Space **Hackathon Project**
Domain: Machine Learning, Front-end Development

Tools: Visual Studio Code,C

- Designed an interactive website as a part of the creative 2k23 Hackathon, Blind Coding
- Participated in a Blind Coding Competition during a Hackathon
- Solved programming challenges without viewing code output and thinking skills
- Demonstrated strong logical thinking and coding skills under time constraints.

Chatbot **Web Development**
Domain: Web Development,

Tools: MySQL

- Created the Student Management System in the College
- Developed a system to manage student records, attendance, and academic information. By implementing CRUD operations using SQL.

Crop Recommendation System **Machine Learning Project**
Domain: Machine Learning

Tools: Python and its libraries

- Developed an online healthcare Consultation platform that connects patients with doctor for virtual appointments and medical guidance

EDUCATION

Bachelor of Technology in Computer Science and Engineering **2022 – 2026**
SVR Engineering College, Nandyal, JNTU-Anantapur — CGPA: 7.0/10

Intermediate (PCM - Physics, Chemistry, Maths) **06/2020 – 03/2022**
Narayana Junior College, Nandyal — Percentage: 65%

ACHIEVEMENTS & CERTIFICATIONS

- Completion certificate of “Python” from Skill Dzire
- Completion certificate of “Data Analysis & Decision Making” from NPTEL

EXTRACURRICULAR ACTIVITIES

- Participated in sports events like Badminton at school level.
- Attended a workshop on Machine Learning.
